Subject: Gold King Mine R9 GIS support

I've been communicating mostly through Bill and now that he's deployed, I wanted to give you all some links and ways to follow up for additional support should you need it while I'm out on vacation next week (Aug. 17-21).

Here is the link to the Gold King Mine web map:

<http://epa.maps.arcgis.com/home/item.html?id=1cb57e2eee624006929c3e13fe31b399> We've been adding data as we find it or are made aware of it.

We're also using the Gold Kings Ops viewer: <https://gis.eparm.net/GoldKingOps>

Nonresponsive

We're also accessing SADIE: <https://r8.ercloud.org/sadie> GoldKingMine

Nonresponsive

What we're doing now:

- Extracting the main stem of the rivers and calculating river miles between key points.
- Looking for any real-time stream monitoring data
- Keeping in touch with Weston and checking the ER Cloud for newly-posted map services to add to the map.

Let us know if there is data you are aware of that you want added to the web map.

In my absence, please reach Stacy at 972-3641 or Frank at 208-699-2712 or email them.

Thanks,

Cheryl
